

Leslye Krampe

Business Development Manager
Conexon

Conexon's Business Development Manager, Leslye Krampe, is a seasoned electric co-op fiber broadband leader. She joined Conexon after serving with one of western Kentucky's largest co-ops in an economic development leadership role, while also managing the co-op's large industrial accounts. Prior to that, with Kenergy, Leslye was instrumental in championing the cooperative's broadband project where more than 59,000 homes and businesses across 14 counties will have access to high-speed, fiber-to-the-home services with Conexon Connect. Thanks to Leslye's dedication and work, that project is now coming to fruition with Kenergy members enjoying the benefits of vital high-speed internet service. In her role at Conexon, Leslye helps educate counties, facilitate funding opportunities, and encourages electric cooperatives and local entities to collaborate in stepping up to bridge the digital divide.
